

S Series Camera

Your E(AI)E for efficiency.

Being the **world's #1**
5G-enabled AI camera, our
solution helps industries,
manufacturers, and system
integrators achieve smarter,
more efficient surveillance and
monitoring.

What S Series Camera can do

Object detection

Instantly identify and track various objects in real time for enhanced situational awareness.

Motion Detection

Detect movement with precision to trigger alerts and recordings, ensuring nothing goes unnoticed.

Line Crossing

Receive immediate alerts when objects or individuals cross designated boundaries, enhancing perimeter security.

Humanoid Detection

Accurately recognise human figures to ensure security and safety in monitored areas.

Area Detection

Monitor specific zones for unusual activity, providing a proactive approach to security.

Unattended Baggage Detection

Automatically flag and alert about suspicious unattended items, bolstering safety measures.

Industry use cases

Delivering smart surveillance solutions that provide real-time insights, enhance safety, and optimize operations—tailored to meet the unique challenges of traffic monitoring, manufacturing, education, healthcare, sports, and smart cities.

Traffic Monitoring

Detect irregular traffic flow, monitor road conditions, and reduce congestion through real-time analysis, enhancing safety and efficiency.

Manufacturing

Improve operational efficiency by detecting anomalies, ensuring employee safety, and optimizing workflows for smoother operations.

Healthcare

Oversee your entire campus from one central dashboard, quickly search and resolve incidents, and prevent unauthorized access for a safer environment.

Education

Enable patient monitoring, track patient movements, and enhance response times, supporting safer and more efficient care.

Sports

Analyze player performance, predict movements, and gather insights to enhance training and strategy.

Smart Cities

Promote public safety, identify crowded locations, and predict behavior patterns, creating safer, smarter urban spaces.

What S series is compared to a conventional camera

	Adiance S Series Camera	Standard CCTV Camera
Pixel	3MP	2MP
Zoom	Up to 10X zoom support	Upto 5X
Resolution	2304×1296;	720X400
Frame Rate	Up to 25 fps	15 fps
Storage	Supports TF card storage up to 256GB	Supports 64 GB
Audio Function	Two-way audio	One-way Audio
Fill Light Distance	20–30 M	9-25 M
IR Distance	Up to 50 M	30-40 M
Power Consumption	≤15W	15W
